The Quality to Meet Needs from Tour Players

New Release T//WORLD TR20 B IRON

On sale from July 17th 2020.

HONMA GOLF CO.,LTD. (Head office: Tokyo Minato-ku / CEO Yasuki Ito) is releasing T//WORLD TR20 B IRON from July 17th 2020 through its own retail stores and at all HONMA dealers.

*TR20: TR means “Tour Release”.

Multiple testing sessions with tour players helped develop dedicated shape and profile to create a club with a stunning appearance that also provides the ultimate in trajectory control and shot shaping through highly optimized CG placement by CAD TAKUMI in Sakata.

Progressive bounce angles from long to short irons were introduced to create a smoother, crisper turf interaction.

Fine milled samples by TAKUMI at SAKATA were made for several tour professionals who used them in competitive play on the PGA TOUR.

For more details of the product, please refer to the next page.

T//WORLD TR20 B

“Turf Interaction” and “Smooth Feeling at Impact” by soft forged tour type blade iron.

HEAD DESIGN (#7)

TECHNOLOGY

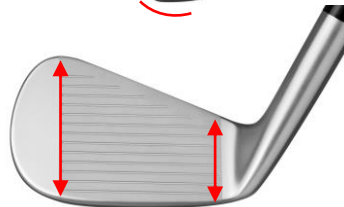

【CG Optimization】

By positioning the CG location closer to the face center, it saves energy loss at the impact while improving its precision, forgiveness, and playability.

【Progressive Bounce Angle】

Setting-up the bounce angle in low-to-high progression helps create the great turf interaction and the consistent impact on any slope angle.

【Easy-to-address and Forgiving Head Shape】

Slightly longer blade length in long irons for more confidence and shorter blade length in short irons for more playability. Difference in height between the toe and the heel brings more forgiveness.
